Re Comparative Effectiveness of Prostate Cancer

November 22nd, 2018 - We agree with the authors'™ conclusion that "Instrumental variable analysis may be a useful technique in comparative effectiveness studies of cancer treatment if an acceptable instrument can be found". 1 However we believe that the instrument chosen falls far short of being acceptable In our opinion much stronger predictors of receipt of a given therapy are needed before results of

Comparative Effectiveness of Therapies for Clinically

March 28th, 2013 - Overall the authors concluded that "assessment of the comparative effectiveness and harms of localized prostate cancer treatments is difficult because of limitations in the evidence". 15 For example only a few RCTs directly compared the effectiveness between rather than within major treatment categories Additionally many of these RCTs were inadequately powered to provide long term survival outcomes with the majority reporting biochemical progression or recurrence as the primary

Effect of Prostate Cancer Severity on Functional Outcomes

January 15th, 2019 - Comparative effectiveness Disease risk Patient reported function Prostate cancer Radiation Surgery Abstract Background Whether prostate cancer severity modifies patient reported functional outcomes after radical prostatectomy RP or external beam radiotherapy EBRT for localized cancer is unknown Objective The purpose of this study was to determine whether differences in predicted function

Comparative Effectiveness of Radical Prostatectomy vs EBRT

January 14th, 2019 - Prostate cancer randomized trials have been

especially difficult to conduct because of large patient and physician biases which often preclude treatment determined by randomization In high risk prostate cancer it is possible that there will never be a completed randomized trial comparing surgery versus RT
